DETAILED ACTION

Election/Restrictions

1. Applicant's election of group III, figures 5-6, claims 1 and 7-8 in the reply filed on 7/5/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 2-6 and 9-11 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/5/2005.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. **Claims 1 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Allison et al. (6,116,674).**

Allison et al. in figures 5, 8 and 19-25, disclose a portable casing comprising a hollow body (44) having at least one cavity (198) defined in the body, a wheel holder (190) securely mounted in each respective one of the at least one cavity and a wheel (196) rotatably mounted on each respective wheel holder.

Regarding claim 7, Allison et al. disclose the body having four sides, a bottom with four edges and four corners and two cavities defined in the body. Allison et al. also disclose two wheel holders mounted respectively in the cavities and each comprising a base securely attached in a corresponding one of the cavities and a wheel mounted pivotally attached to the base for a wheel rotatably mounted in the wheel mount.

Regarding claim 8, Allison et al. disclose the cavities, which are defined in one side of the body near the bottom and each wheel mount is inverse U-shaped and has one end pivotally connected to the base.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rhaney et al. disclose a mobile cooler with retractable wheels, Dumoulin, Jr. discloses a cooler with fold-down corner wheels, Jackson discloses a wheel cooler.
